ESTIMATES:

- There is no charge for estimates if the estimate is declined and the unit is returned to the customer un-assembled.
- If the customer declines the repair, but wants the unit reassembled, there will be a \$75.00 + GST charge, payable at the time the estimate is declined – prior to re-assembling the unit.
- 14 days after the estimate is declined, regardless of whether it is re-assembled or not, the unit will be considered abandoned and will be scrapped.

ECO FEES / SOLVENT RECYCLING

Due to the increased regulations covering the use & disposal of solvents and the increasing cost of solvents, we now charge an **ECO FEE**. This fee covers the cost of purchasing, storing and **recycling used solvents**. An **ECO FEE** will only apply to units that require the use of solvent for cleaning or storage. (except for water, pump conditioner or windshield washer antifreeze)

Our mechanics are factory service trained & certified warranty repair technicians.

We maintain a comprehensive inventory of genuine manufacturer's repair parts for most models that we service.
