

Repair and Maintenance Parts Policy

Please help us to help you get back on the job as quickly as possible

MANDATORY: You must identify the make and model of your unit

– just imagine trying to buy a part for your car without telling them what kind of car you have

Manufacturers are using unique parts for each of their sprayers. Parts are almost never interchangeable. We cannot guess at a part. You must provide us with the make and model of your unit.

SUGGESTION:

Take a picture of your sprayer or accessory's model and serial number when you first purchase it so that you will be able to see it if and when it gets dirty.

Keep a file of your machine's and accessory's manual and paperwork. It will have the make and model on it. Record the equipment's serial number.

Repair and Maintenance Parts are **NON-REFUNDABLE**
