ASSESSMENTS:

\$ 85.00 + gst

Declined estimate Re-assembly:

\$ 85.00 + gst

- There is an \$85 minimum non-refundable fee for an assessment. The fee is due before the assessment is done.
- If repair work is completed, the assessment fee will be applied to the total cost of repair.
- If the estimate for the repair work is declined the unit will be returned to the customer un-assembled.
- If the customer wants the unit re-assembled, there is an \$85.00 + gst re-assembly charge, payable prior to re-assembling the unit.
- 30 days after the estimate is declined, regardless of whether it is re-assembled or not, the unit may be considered abandoned.

ECO FEES / SOLVENT RECYCLING

\$10.00 + gst (minimum)

Due to the increased regulations covering the use & disposal of solvents and the increasing cost of solvents, we now charge an **ECO FEE**. This fee covers the cost of purchasing, storing and **recycling used solvents**. An **ECO FEE** will only apply to units that require the use of solvent for cleaning or storage.

Our mechanics are factory service trained & certified warranty repair technicians.
We maintain a comprehensive inventory of genuine manufacturer's repair parts
